BOXFIX plus – now with cutting-edge nail technology

The BOXFIX plus assembly device is suitable for the pneumatic assembly of all our box systems. Two assembly options are available: you can either screw all the required parts together or use convenient nail technology for seamless and even faster assembly.

Assemble different back heights and widths.
Thanks to pneumatic clamping, you no longer
need to set stops.

Nail or screw the back fixing to the chipboard back.

Insert the base, the cabinet back and the drawer sides.
With BOXFIX plus, all parts are pneumatically fixed.

Why nails instead of screws?

Efficient and convenient

- Easy assembly without pre-drilling
- Quick assembly using an air nailer with integrated magazine
- Reduce assembly time by as much as 40%

Quality

- The nails are driven through the metal directly into the chipboard back and drawer base. This creates a flush seamless joint between the fittings and wooden parts.

Ordering information

- Pneumatic assembly device for assembling drawers and high fronted pull-outs
- Assembly type: nails or screws
- Nominal length NL 270–650 mm
- Cabinet width KB 250–1200 mm
- Back heights up to 250 mm (wood and steel)
- Material: aluminium/steel
