SERVO-DRIVE + BLUMOTION
inside + inside

A light touch on the front using your hand or elbow is all that's required to open lift systems with SERVO-DRIVE for AVENTOS. Even large and heavy fronts open effortlessly with gravity-defying ease. For the kitchen user, this means easy access to the cabinet interior.

Effortless opening...

Opening and closing made easy: Simply press the front with your hand and the lift system opens. To close, press the switch that is easily accessible on the cabinet sides. Thanks to BLUMOTION, closing is silent and effortless.

...and closing

Comfortable and easy closing: Provided by the easy to reach switch on the cabinet sides that enables lift systems to close easily and ergonomically. The proven BLUMOTION function also ensures silent and effortless closing.

i

Innovative technology

...ensuring maximum safety

The closing procedure can be stopped at any time, for example if the user manually stops the front from closing, or the front collides with an object placed in the closing path.

...for easy assembly

Tool-free front assembly to the lift mechanism using CLIP technology.

... for easy cabling

The cabling of the drive unit and other accessories is practically tool-free – thanks to piercing technology.

i

The advantages of SERVO-DRIVE for AVENTOS
