

# TIP-ON

## for doors

PRODUCT  
MEMO

**blum**

### Opening handle-less doors

Handle-less furniture are becoming more and more popular in the living area. Blum is able to assist with this trend through TIP-ON — the mechanical solution for opening doors.

### Optimal opening

Doors open easily with just a light touch. Doors only open far enough to allow a glimpse of the inside without affecting the freedom of movement within the room.

### Secure closing

With TIP-ON, doors close simply and securely. All you need to do is press on the door or push it closed. A magnet along with a screw-on plate ensures that the door remains securely closed.

TIP-ON can be combined with all CLIP top unsprung hinges.

i

### Easy assembly

TIP-ON for doors has few parts and is easy to assemble. Ideally, TIP-ON should be located at the optimum handle fixing position. There is a standard version for overlay doors and an extended version for high cabinets and inset doors.

### TIP-ON assembly options:

( ) For extended version

#### 1. Drilling assembly

TIP-ON can be easily installed by drilling the end panel. When drilling, you only need to plan a front gap of 2.6 mm.

#### 2. Assembly with adapter plate

Can also be assembled using an adapter plate (horizontal or cruciform). Fixing using an adapter plate requires a gap of only 1.5 mm.
