TANDEMBOX antaro S2 in silk white

## TANDEMBOX antaro - the latest addition

This new pull-out system is characterised by single or double rectangular gallery rails. By using these angular elements and by harmonising the colour of all fittings components, we have created a system that is a clear alternative to TANDEMBOX plus.

TANDEMBOX antaro S3 in silk white

## New design with a rectangular gallery

Tandembox antaro is based on tried and tested system components. It has the same cabinet profiles and back as the other models. And the colour and material concept of "antaro" is also based on that of "intivo". This means that manufacturers have a manageable product range that offers many new and different opportunities for design.

i

## Advantages at a glance

- Simple product design
- Colours of nylon components matched to the drawer side
- 4 drawer side colours (Silk White, Terra Black & Silver Grey options, and inox)
- High fronted pull-outs and inner pull-out options with single or double gallery
