Useful applications for your processes

Blum would like to offer as much support as possible to customers and partners – tailored to your needs, at the click of a button and around the clock. Practical online applications and sophisticated software help ensure precise planning, easy ordering and effective marketing.

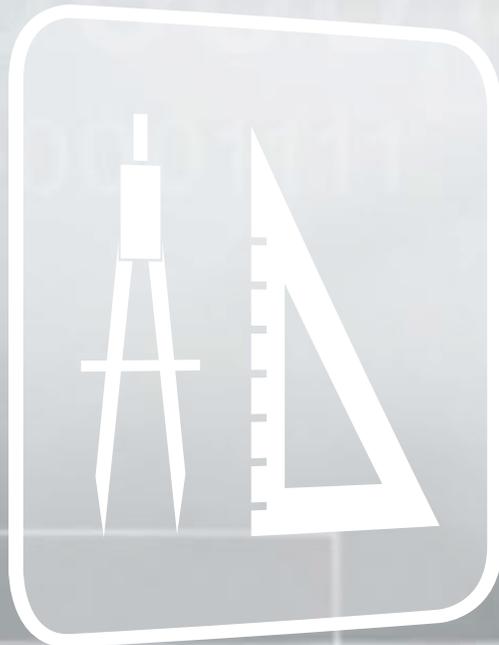

E-SERVICES

Blum E-SERVICES provide you with access to the latest product information and marketing documentation, which is always up-to-date and available online 24/7.

Product configurator

The online product configurator helps users select and order the right fittings and provides detailed additional information on Blum products.

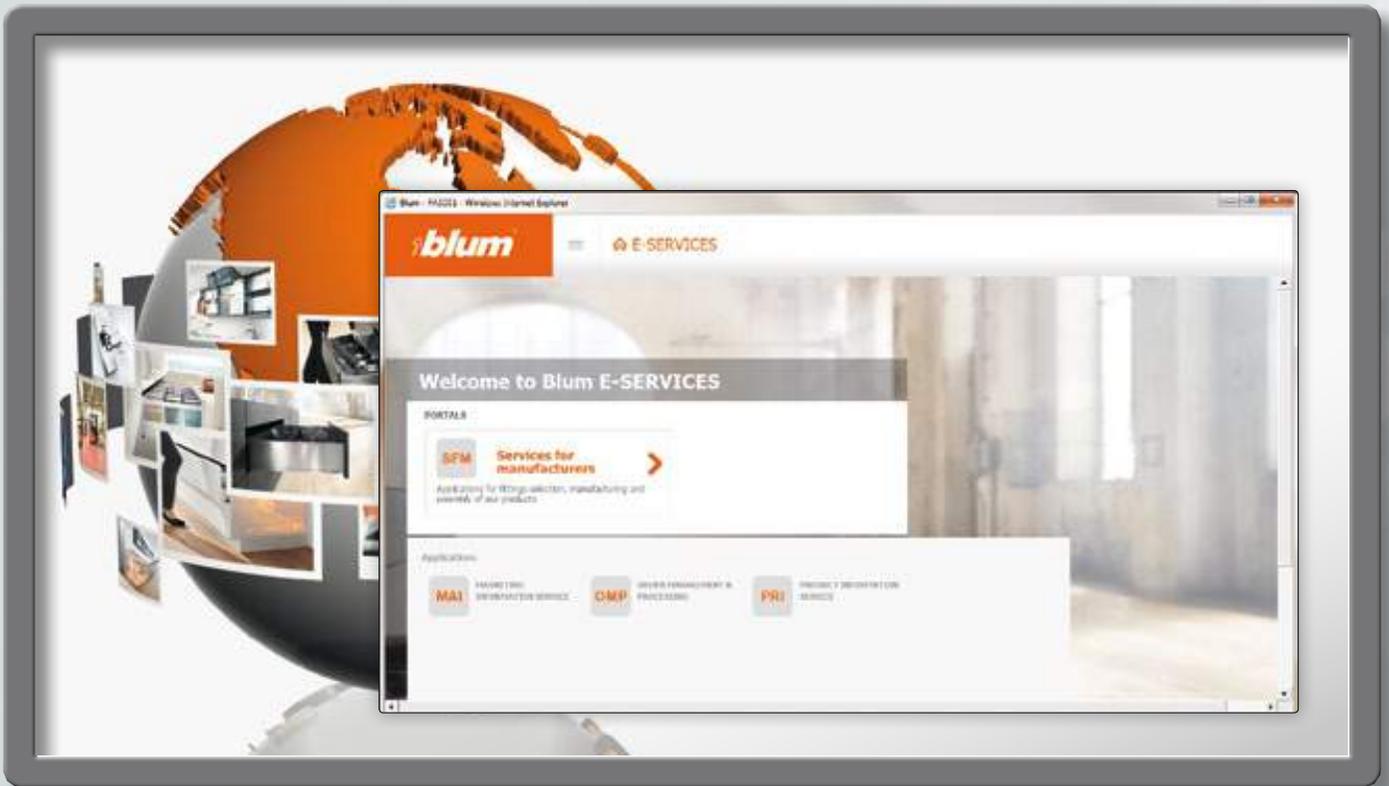

Product configurator – additional features

Additional functions, such as the CAD data service, online shopping basket, single product search and simple calculation tools are also available alongside the product configurator.

DYNALOG

Using DYNALOG, planning with Blum fittings is complete and precise. The interfaces in the DYNAPLAN cabinet planner allow data to be exported to various CAD/CAM programs.

E-SERVICES

E-SERVICES give access to many Blum online applications. The services for marketing support, such as the MARKETING INFORMATION SERVICE, provide lots of marketing documentation. Detailed product information, for example, can be obtained via the PRODUCT INFORMATION SERVICE.

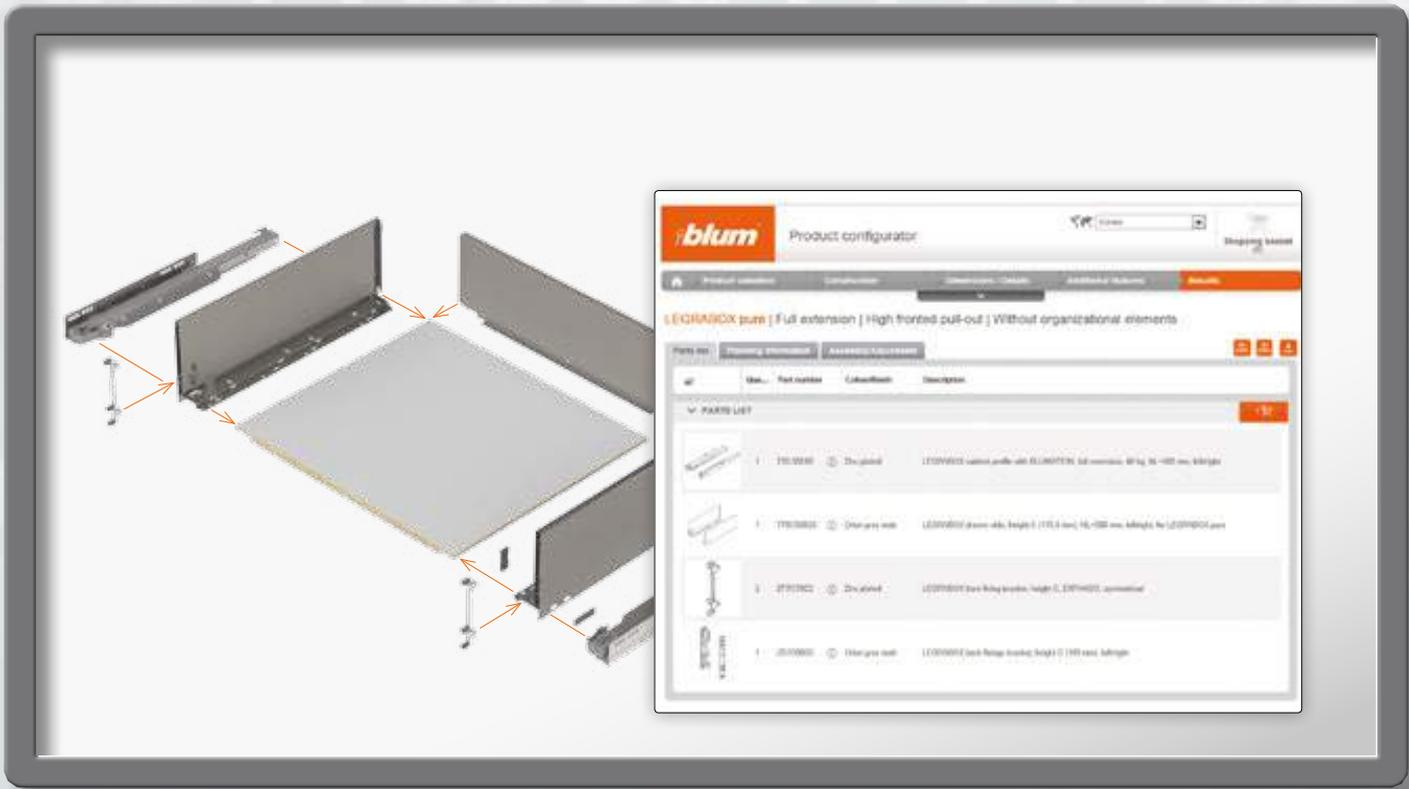

Advantages at a glance:

- E-SERVICES are available free of charge
- 24/7 access to current communications material, for example, brochures, product images, photos and videos as well as product data and technical information for further processing by you
- Download of media files for continuing use

Access to Blum E-SERVICES

Registration is required in order to access E-SERVICES. You still don't have your login information? Please get in touch with your personal Blum contact at www.blum.com/contact.

Product configurator

With the online product configurator, fitting applications, such as a complete high fronted pull-out with inner dividing systems, can be individually configured. Parts lists are exported collision checked and can be added straight into the shopping basket. Registered customers also benefit from useful additional features.

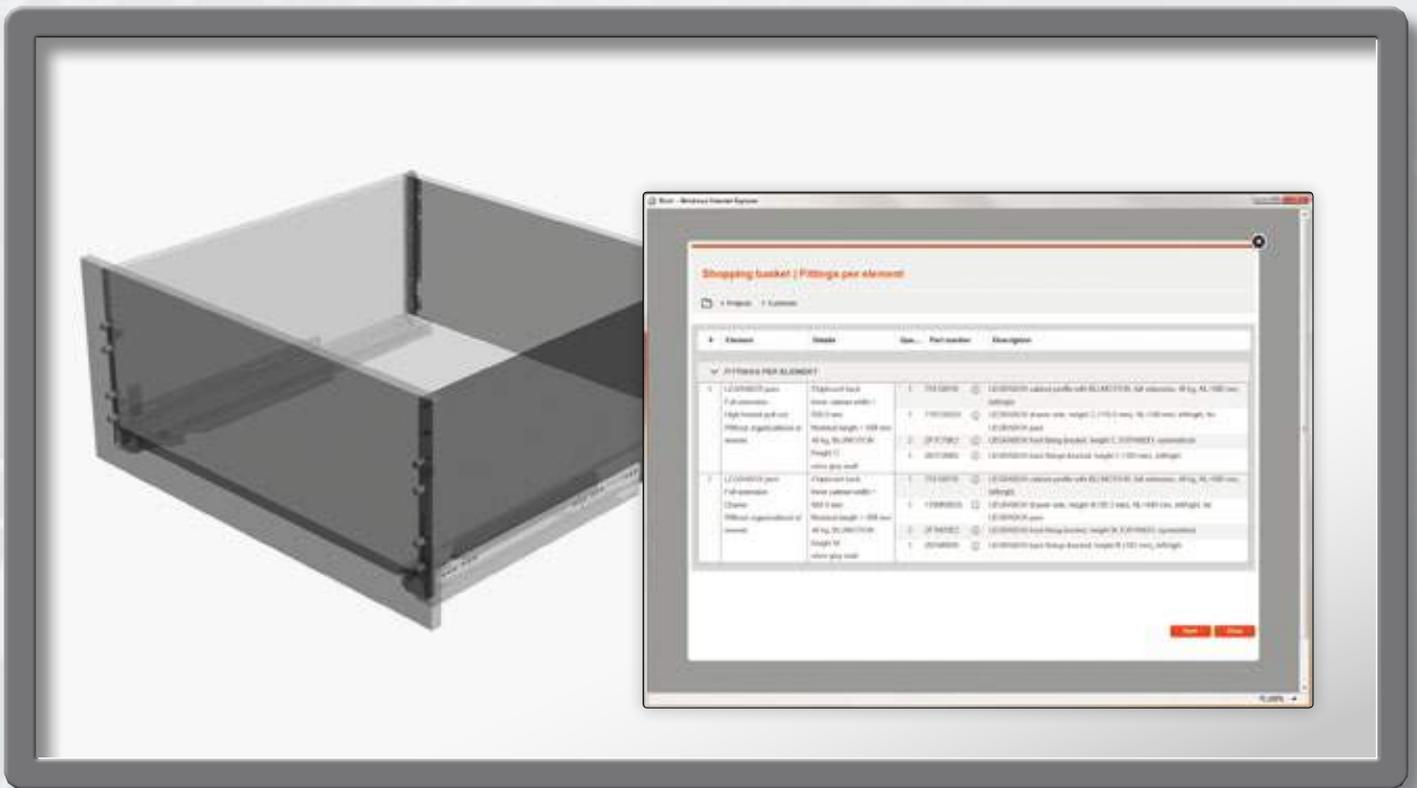

Advantages at a glance:

- Simple configuration of complex applications – for every kind of installation
- Provision of verified parts lists as well as current marketing information and manufacturing and assembly documentation
- Always up-to-date and available online – no installation of software or updates required

Access to the product configurator

The basic functions of the online product configurator are available immediately without registration.

Product configurator – additional features

CAD data for furniture design

- Current, verified CAD data for further processing using your design software
- CAD data are available in the popular 3D formats
- Configured product applications are available as precise 3D arrangements, and dimensionally accurate design drawings as 2D CAD data in the popular formats

Online shopping basket

- Management of parts lists and assignment to individual commissions or projects
- Export of components lists to the online ordering system of preferred distributors
- Overview of prices/availability in the relevant distributor system

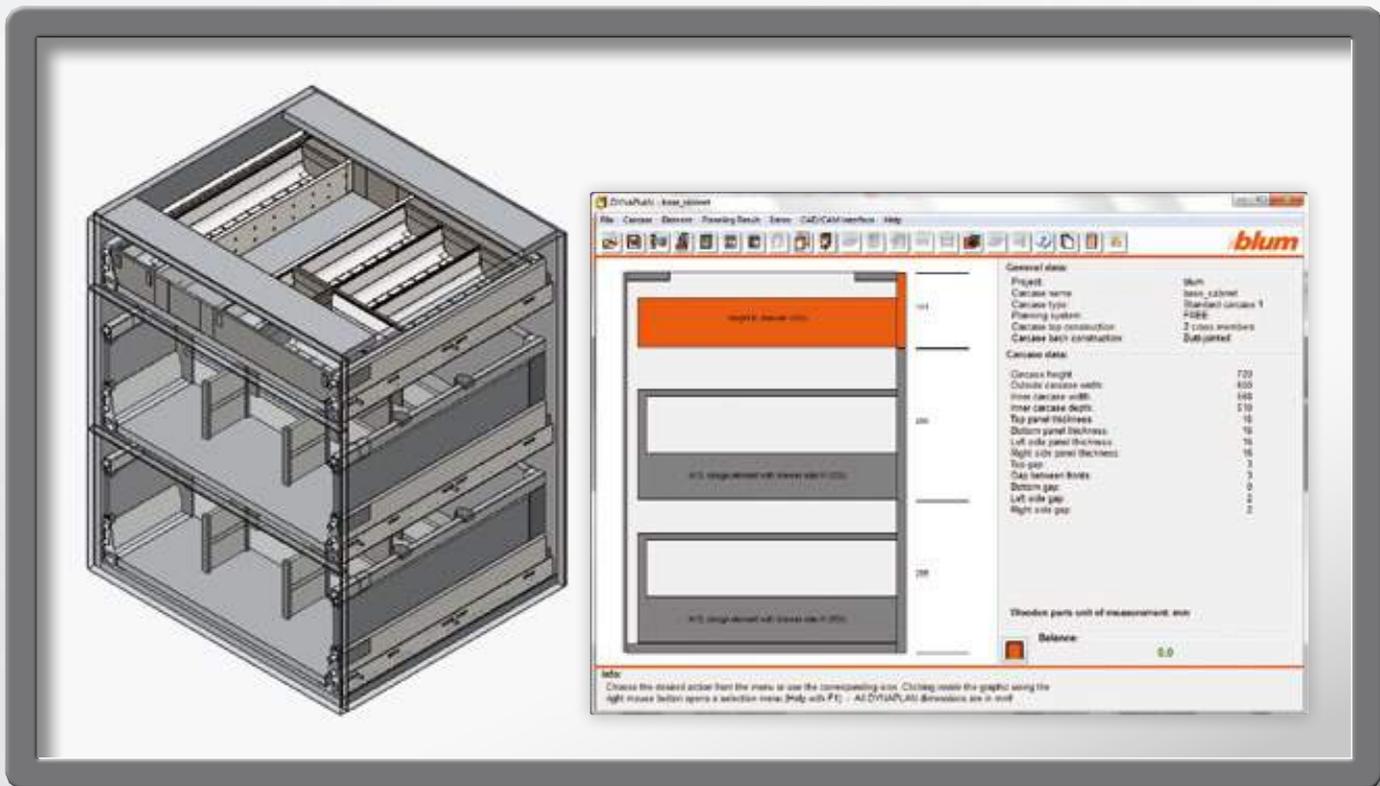

Calculation tools and single product search

- Simple calculation tools support you, for example, when determining the door weight of a lift system, by calculating the required number of AVENTOS lift mechanisms
- Integrated single product search with ordering options via the shopping basket

Access to the full range of services

You can gain access to the full scope of the online product configurator by registering for free or using your existing E-SERVICES login details.

DYNALOG

Using the DYNALOG planning software, cabinet planning for Blum fittings is complete and precise. Automatic collision checking in the DYNAPLAN cabinet planner ensures that designs are feasible and does away with trial applications. The interfaces in DYNAPLAN allow data to be exported to and imported from CAD or CAM programs.

Advantages at a glance:

- DYNAPLAN calculates the correct fitting positions and determines the necessary parts lists, fittings data and wooden parts – for complete production data
- You can transfer your planning directly to a 3D visualisation in the CAD program via the particular interface and details, such as surfaces, handles and other accessories can be added here
- Planning can be edited and adjusted at any time thanks to the communication between the CAD main program and DYNAPLAN

Access to DYNALOG

You can order DYNALOG as a DVD from your fittings suppliers or directly from Blum via email to dynalog@blum.com. For your DYNAPLAN interface, please contact your software manufacturer. More information can be found in the current contact partner list at www.blum.com/interfaces.
