 **blum**[®]

A photograph of a white kitchen cabinet with a TandemBox drawer system. The drawers are partially open, revealing the internal metal structure. Three callout lines point to specific features: 'Optimised feather-light glide' points to the left side of the drawer's internal track, 'Quality to the touch' points to the right side of the drawer's internal track, and 'Easy opening' points to the bottom of the drawer's internal track. The background shows a wooden floor and a white wall.

Optimised feather-light glide

Quality to the touch

Technological developments

TANDEMBOX has been impressing users with its high ease of use and wide range of available design options for many years, but this box system's technology has now been updated, taking it to a whole new level.

Easy opening

blum

Easy opening

Lower opening forces and an even smoother transition to the feather-light glide raise the level of convenience from the moment you open the pull-out.

Quality to the touch

You can feel the increased stability provided by the combination of the optimised drawer side and new front fixing bracket.

Optimised feather-light glide

Components in the drawer side and cabinet profile have been developed, perfecting the feather-light glide of TANDEMBOX and the smooth running action even further.
