

EXPANDO T

Thin fronts,
easily assembled

8 mm

Rediscover simplicity

Minimalist design creates room for inspiration. Broaden the range of your possibilities for implementing trends in furniture manufacturing. The first fixing system for thin fronts for lift systems, doors and pull-outs makes minimalist furniture design simple.

Detailed information

www.blum.com/award

Easily implemented: three applications

To make it as easy as possible for you we have developed a fixing system that you can use to implement a total of three applications: lift systems, doors and pull-outs. Furniture impresses with thin fronts and proven Blum functionality – in all living areas.

An easily assembled system

Our fixing system for thin fronts is based on EXPANDO T. Steel teeth bite into the material of hard fronts, and nylon components ensure firm anchorage in soft panels. To fix EXPANDO T, drill a hole of 10 mm in diameter and just 6 mm in depth.

min 6 mm

Assembly made easy

Wall cabinets, doors and pull-outs equipped with EXPANDO T for thin fronts all have one thing in common, they are easy to assemble and adjust. Drill, insert and tighten screws. That's it. EXPANDO T is also available as a single dowel for other applications.

With the fixing mechanism for CLIP top BLUMOTION for thin doors, we have succeeded in integrating the BLUMOTION functionality into hinges – without any need for a hinge boss. Thanks to zero protrusion, this hinge is also suitable for cabinets with inner pull-outs or pull-out shelves.

Chosen lift system types –
AVENTOS HS, HL and
HK top – can be implemented
with the fixing system for
thin fronts – with an unchanged
fixing position.

Thin fronts best bring out the
streamline design of LEGRABOX
and MERIVOBX drawers.
Fixing positions remain the
same so fronts can be
assembled in next to no time.

Easily combined materials

Our fixing system EXPANDO T for thin fronts from 8 mm is suitable for many materials and even allows for exceptional design ideas. Surprise your customers with customised furniture.

Trim and concise range

A single fixing system for three applications with thin fronts makes product selection and ordering significantly easier. Implement different lift system types, LEGRABOX and MERIVOBX pull-outs in different heights as well as conventional door applications – with few components.

Advantages at a glance

- 3 different applications – lift systems | hinge systems | box systems
- Thin fronts of 8 mm or more
- EXPANDO T – pre-assembled fixing system
- Different front materials
- Use the online Product Configurator – which calculates all dimensions for your planning in the drawings
