

AVENTOS HK-XS

Small fitting, great convenience

www.blum.com

 **blum**[®]

Small fitting – high quality

AVENTOS HK-XS is the compact fitting for small stay lifts in high and wall cabinets. Thanks to the narrow style, AVENTOS HK-XS offers a high level of design freedom.

High quality of motion – typical of AVENTOS

AVENTOS HK-XS proves itself with the familiar AVENTOS quality of motion. Stay lifts open and close with seemingly weightless movement. They close silently and effortlessly in combination with CLIP top BLUMOTION hinges.

 **blum**

High quality of motion

The variable stop allows the lift system to remain in any desired position and always within easy reach.

Numerous possibilities

Whether thick wooden fronts with wide or narrow aluminium frames, the fixing positions always remain the same. This allows different materials and front thicknesses to be easily integrated.

Proven Blum quality

The lift mechanism with a robust spring package is the core element of the compact fitting. The AVENTOS HK-XS proves itself in this way with high stability and durability. High quality is ensured for the lifetime of the furniture.

A wide range of applications in every living area

The compact design of the AVENTOS HK-XS means that cabinets with small internal depths can be equipped easily. The symmetrical lift mechanism can be used on one or both sides. For the widest range of applications and a high level of design freedom.

 **blum**

Wide folding fronts

If the lift mechanism is utilised on both sides, large, heavy fronts can also be used.

Above the extractor

Thanks to the small installation depth, it is possible with AVENTOS HK-XS to make optimal use of the space above the extractor, for example.

In the mirror cabinet

Wall cabinets with small internal depths are also ideal for use in the bathroom, for example over the sink. This has the advantage that storage items are well organised and always close to hand.

Cabinet fixing

There are various fixing methods available for fixing the lift mechanism to the cabinet. The fixing positions always remain the same, regardless of the thickness and material of the front.

Front fixing bracket

Fixing brackets are available for wooden fronts and for wide or narrow aluminium frames.

CLIP mechanism

The lift mechanism can be assembled tool-free using the CLIP mechanism.

Easy assembly

AVENTOS HK-XS can be assembled virtually tool-free. The infinitely variable adjustment is carried out from the front using the adjustment screw. Calibration helps to ensure the front is balanced. This guarantees the front will stop in any desired position.

TIP-ON for handle-less stay lifts

Handle-less furniture has become an increasingly popular fixed element of modern furniture design. TIP-ON, the mechanical opening system, makes opening easy and convenient – also compatible with AVENTOS HK-XS.

Easy opening

A single touch on the front releases the lift system so that you can open it upwards with ease.

Colour variants

The TIP-ON unit is available with matching adapter plates. The adapter plate is also available with a nickel finish. This allows it to be integrated discreetly into the cabinet or to create contrasts in colour.

Integrated front gap adjustment

The front gap adjustment is integrated in all versions and can also be used with drilled in TIP-ON. The front gap can be made larger or smaller by simply turning the ejector.

AVENTOS – An inspiring range of lift systems

AVENTOS lift systems ensure high quality of motion. Whether in the kitchen or another living area, for small fronts or large, AVENTOS ensures that lift systems can be opened with consummate ease. Freedom of movement is guaranteed throughout, and fronts are always out of the user's way.

AVENTOS HF

Bi-fold lift system

- Ideal for high, bi-fold fronts in wall cabinets
- Low upward space requirement
- Can be used with fronts of different heights

AVENTOS HS

Up & over lift system

- Ideal for large, one-part fronts in wall cabinets
- The lift system pivots over the cabinet
- Can also be combined with cornice or crown moulding

AVENTOS HL

Lift up

- Ideal for large, one-part fronts in larders and wall cabinets
- Suitable for use with fronts above it
- Conceals electronic devices, for example, behind a continuous front

AVENTOS HK

Stay lift

- Ideal for heavy fronts in wall cabinets
- Low upward space requirement
- Complete fitting

AVENTOS HK-S

Small stay lift

- Ideal for small fronts in top wall cabinets
- Lift mechanism fits harmoniously into small cabinets, e.g. above the refrigerator or larder
- Complete fitting

AVENTOS HK-XS

Small stay lift

- Ideal for small, top wall cabinets
- Also suitable for cabinets with low internal depths, e.g. above the extractor
- Small fitting, can be used on one or both sides

- Well suited for top wall cabinets
- Cabinet height from 240 mm to 600 mm
- Interior depth minimum 125 mm
- Closes silently and effortlessly in conjunction with CLIP top BLUMOTION hinges
- Can be combined with TIP-ON to open handle-less fronts
- Well-balanced quality of motion due to light operating forces, a variable stop and BLUMOTION
- Simple, virtually tool-free assembly and easy adjustment
- Symmetrical lift mechanism – can be used on one or both sides
- High-quality design

Power factor LF = cabinet height KH (mm) x door weight incl. double handle weight (kg)

☐ Standard

☒ TIP-ON

Note: the power factor is doubled when used on both sides.

A trial application is recommended when you are in a borderline area for the individual lift mechanism.

The company Blum

Founded over 60 years ago by Julius Blum, Blum is a family-owned company that operates on an international scale. Its strategic business segments include lift, hinge and pull-out systems. All our product developments focus on perfecting motion.

www.blum.com

Blum in Austria and around the world

The company has seven plants in Vorarlberg, Austria, additional production sites in Poland, the USA and Brazil and 29 subsidiaries/representative offices. Blum supplies more than 120 markets. The Blum Group employs 7.300 people in total, 5.500 of whom work in Vorarlberg.

Global customer benefits

"Whether manufacturer, distributor, fitter or kitchen user – everybody should personally enjoy the benefits of Blum products" – that is Blum's philosophy on global customer benefits.

Innovations

To support customers with innovative fittings solutions and secure long-term success for the company, we need to consistently invest in research and development, in plants and facilities and in employee training. With more than 2.600 patents worldwide, Blum is one of Austria's most innovative companies.

Quality

Blum's comprehensive concept of quality does not only apply to products. Services and collaboration with customers and partners should also meet the same quality requirements.

Environment

At Blum, we believe that responsible ecological behaviour has long-term economic benefits. The longevity of products is just one of many important aspects. Other important measures include the use of environmentally-friendly processes, the intelligent use of materials and prudent energy management.

DYNAMIC SPACE

Good workflows, optimum use of storage space and top quality motion are important features of a practical kitchen. Blum's ideas for practical kitchens are designed to bring function, convenience and ergonomics to furniture interiors.
