

# MOVENTO – The sophisticated runner system

[www.blum.com](http://www.blum.com)

 **blum**<sup>®</sup>

# Quality steel for your wooden design ideas

MOVENTO is a concealed runner system and the sophisticated solution for your wooden design ideas. The synchronised feather-light glide ensures an ultra-smooth running action. The 4-dimensional adjustment options provide you with a precise gap layout. What's more, the full extension excels in terms of high stability and load bearing capacity. MOVENTO can be used with all 4 motion technologies for soft and effortless opening and closing.

# One runner system for all living areas

The MOVENTO runner system boasts an impressively wide range of applications and is suitable for use in all living areas. Its load bearing capacity of up to 70 kg and high stability make it the preferred solution for extremely wide and deep high fronted pull-outs. It makes real storage wonders out of cabinets in the kitchen, living room and hall.

### MOVENTO in kitchens

Your customers open and close drawers again and again during everyday kitchen use. The MOVENTO runner system can handle these demands easily. Its stability and load bearing capacity make it ideal for wide and high pull-outs with heavy items, such as pots or pans. The 4-dimensional front adjustment options guarantee a precise gap layout.

# MOVENTO Properties

**Synchronised feather-light glide for more peace and quiet – everything in perfect harmony**

The synchronised feather-light glide is a special feature of the MOVENTO runner system. The runner components run smoothly and silently – for soft and effortless opening and closing. Low-friction cylindrical nylon rollers ensure an optimal weight distribution.

**Innovative technology for greater quality of motion – simple, soft and effortless**

Your customers will appreciate the enhanced ease of use of MOVENTO; when the drawer is opened, the runner profile immediately transitions to the feather-light glide. And thanks to the BLUMOTION soft-close mechanism, it closes again just as softly and effortlessly – even when heavy pull-outs receive a forceful push.

**High stability for a greater load bearing capacity – more than a match for all requirements**

MOVENTO boasts excellent stability and a high load bearing capacity. Thanks to its superb sag values, the runner system is ideal for applications near to the floor, too. This makes the full extension with 40 kg and 70 kg load bearing classes the first choice for all living areas, even when you are using wide, high and deep pull-outs.

## Motion technologies for MOVENTO

MOVENTO can be implemented with all 4 motion technologies by Blum – you decide which one best meets your requirements. Adaptive soft-close BLUMOTION ensures that your wooden drawers close softly and effortlessly; they seem to open by themselves with the SERVO-DRIVE electrical opening support system. TIP-ON BLUMOTION combines a mechanical opening support system with a soft-close mechanism. Drawers open with a single touch thanks to TIP-ON.

# 4 dimensions for greater precision

With MOVENTO, you can adjust the height, tilt and depth of the front and also modify it at the sides. And you can benefit from optional depth adjustment on furniture with inset fronts. There is no need to alter the drawer and you get a precise gap layout quickly, easily and without tools.

# Support every step of the way

For MOVENTO, we also offer services and assembly devices for all your day-to-day tasks. For instance, the MINIPRESS top drilling and insertion machine with EASYSTICK assists with all vertical and horizontal drilling operations. The drilling template for distance bumpers, the universal drilling template, the front gap template for MOVENTO and the gauge set and marking template all ensure that assembly is quick, easy and precise. Thanks to the EASY ASSEMBLY app, 4-dimensional adjustment of the front takes no time at all.

# The right runner system for every requirement

Depending on your requirements, there are several different runner systems for your drawers. The versatile TANDEM runner system impresses with a broad range: choose from several types of extension and three motion technologies. The MOVENTO concealed runner system is the sophisticated solution to meet exacting requirements: it boasts a synchronised feather-light glide, 4-dimensional adjustment and is fully compatible with all four Blum motion technologies.

## TANDEM Full extension

## TANDEM Single extension

# MOVENTO

A photograph of a light-colored wooden cabinet with a drawer pulled out. The drawer is supported by a metal runner system, which is visible. The background is a wall made of horizontal wooden planks. A white line with a circle at the end points to the drawer's edge.

## 760H/766H – drawer/inner drawer

- Concealed full extension
- Includes integrated, switchable BLUMOTION S for soft and effortless closing, and can be combined with SERVO-DRIVE or TIP-ON BLUMOTION
- Or with integrated TIP-ON, the mechanical opening support system
- Synchronised feather-light glide
- BLUMATIC self-closing feature
- Tool-free side, height and tilt adjustment
- Optional tool-free depth adjustment
- Built-in width and depth tolerance compensation

## TIP-ON BLUMOTION

- TIP-ON mechanical opening support system combined with BLUMOTION for soft and effortless closing
- Dynamic carrying capacity of 40 kg and 70 kg
- Synchronised feather-light glide
- Small minimum front gap of just 2.5 mm
- Extensive trigger range
- Synchronisation with internal cabinet width of 265 mm or more
- 4-dimensional front adjustment option

Drawer/high fronted pull-out

Inner drawer/pull-out

### TIP-ON BLUMOTION synchronisation

An extensive trigger range is achieved even with a small minimum front gap of 2.5 mm. To achieve optimal function and to extend the trigger range, we recommend using a synchronisation linkage.

- With synchronisation
- Without synchronisation

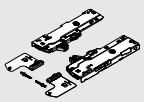

Example for 760H, nominal length NL 500 mm, four sided drawer, with and without synchronisation

LW Internal cabinet width  
NL Nominal length

## TIP-ON BLUMOTION

Make the right calculations for your TIP-ON BLUMOTION unit using the product configurator: [www.blum.com/configurator](http://www.blum.com/configurator)

1	TIP-ON BLUMOTION set			
	<b>Consisting of:</b>			
	1a	2 x	TIP-ON BLUMOTION unit	
	1b	2 x	TIP-ON BLUMOTION latch	
	1c	2 x	synchronisation adapter	
	NL (mm)	Unit	Weight (kg)*	
	270–320	S0	≤ 10	T60L7040
		S1	> 10–20	T60L7140
	350–750	L1**	≤ 20	T60L7340
		L3	15–40	T60L7540
		L5***	35–70	T60L7570

## Accessories

TIP-ON BLUMOTION synchronisation adapter		
	Symmetrical	
	When used with 2, two pieces required each time	
	LW ≥ 314 mm	T60.000D

TIP-ON BLUMOTION front gap template		
	For adjusting the front gap to 2.5 mm on both sides	
		65.5631
	Use of the front gap template is recommended!	

2	TIP-ON BLUMOTION synchronisation linkage		
	Possible for LW ≥ 314 mm		
	Suitable for LW up to 1370 mm		
			T60.1125W
	Shaft cutting: LW - 267 mm		
To optimise the function and trigger range, we generally recommend using synchronisation.			

## For short LWs (alternative to 2)

	TIP-ON BLUMOTION one-part synchronisation		
	Symmetrical		
	LW 265–313 mm		T60.300D
	Cutting: LW - 241 mm		

\* Recommended weight ranges (total weight of pull-out) for optimum opening and closing function

\*\* Can only be combined with 40 kg runner (760H)

\*\*\* Can only be combined with 60/70 kg runner (766H)

LW Internal cabinet width  
NL Nominal length

## TIP-ON BLUMOTION

### Planning

#### Furniture construction

Precise manufacturing is required to ensure a front gap of at least 2.5 mm. This means that the construction must adhere to the dimensions and angles planned.

#### Depth position

Ensure that both runners are positioned at the correct depth.

#### Front assembly

Bumpers must not be installed for TIP-ON BLUMOTION!

#### Space requirements in the cabinet

\* + 1 mm for assembly of the runners prior to cabinet assembly

#### Drawer/inner drawer

\* Limited side adjustment for a drawer side panel thickness of 16 mm, but with full tolerance utilisation of the internal drawer width

#### Drawer

#### Inner drawer

ISKL Inner drawer length  
LW Internal cabinet width

NL Nominal length  
SKL Drawer depth

SKW Internal drawer width  
X Front thickness

## TIP-ON synchronisation

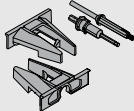

- Synchronisation for secure opening and closing for MOVENTO with TIP-ON
- To enlarge the trigger range on the pull-out front
- Recommended for cabinet widths of 600 mm or more
- Front gap 3.5 mm
