# MERIVOBX

## Let's create

www.blum.com

## Let's create – The box platform for your ideas

MERIVOBX is based on a platform concept so you can create a broad range of drawers and pull-outs with just a few components – and all with the same easy assembly process. This simplifies production processes and increases efficiency.

**Drawer M**  
Drawer side height M is a true all-rounder – as a drawer, but also as a base for all high fronted pull-out options.

**MERIVOBX modular with gallery**  
The high fronted pull-out option with a gallery is eye catching and a top quality, entry-level solution.

**MERIVOBX modular with BOXCOVER**  
Glass design elements capture the light and create a classy impression.

**MERIVOBX modular with BOXCAP**  
Experts consistently opt for metal: it accentuates the clear cut design.

# Platform

It takes just a few components to create your own extensive range. And you can make furniture manufacturing even more efficient at the same time. Diverse and yet simple.

## Cabinet profile

The cabinet profile forms the basis of the platform: you can use the same fixing position (height and depth) for all applications – be it with BLUMOTION, SERVO-DRIVE or TIP-ON BLUMOTION, with side stabilisers or for inner drawers.

## Front

Fronts and front pieces are always manufactured and assembled in the same way, facilitating furniture manufacturing.

## Drawer side

Different possibilities for combining drawer sides – distinctive look thanks to the characteristic design line.

# Design

MERIVOBX boasts straight lines and a striking look. Create your own diverse and unmistakable range of furniture! Modern minimalism meets distinctive design.

**Smooth transitions**  
For virtually seamless pull-outs.

**Exposed metal parts**  
Metal components and a coordinated colour scheme create a top quality look.

**Distinctive drawer side design**  
The slim drawer side has a distinctive design line that creates exciting light reflections.

**Straight on the inside with flush cover cap**  
The clear cut design on the inside is rounded off by a flush cover cap. AMBIA-LINE beautifully organises interiors even with cover caps in place.

**Branding element**  
Add your own branding to the drawer side – simply slide on the branding element for consistent positioning.

# Functionality

The newly developed cabinet profile concept delivers extremely smooth running action and high load bearing capacity coupled with a feather-light glide and enhanced stability.

**High front stability**  
The front attachment is extremely stable. No additional stabiliser is needed even when implementing high cabinet fronts.

**Pull-out stop**  
Secure connection between cabinet profile and drawer.

**Synchronised feather-light glide**  
The new box system is characterised by a smooth opening and closing action.

**Interface for optional components**  
Equip MERIVOBX with motion technologies and side stabilisers to suit your needs.

**Stable front position**  
No matter whether empty or fully laden. Once adjusted, the gap layout will remain aligned to create a harmonious look.

**Vertical stability and full load bearing capacity**  
The box system is exceptionally stable thanks to the unique L shape of the cabinet profile. What is more, it has a high dynamic carrying capacity of 40 or 70 kg.

# Assembly

A well-thought-out concept. No matter which model you opt for, assembly is always simple and adjustment always the same. It is extremely easy to achieve precise results.

**Fast and reliable assembly and removal of fronts**  
The holding position allows you to insert fronts with ease (even if a pull-out is already in place). And makes it easy to remove very wide fronts, even alone.
