i

Technical details

The new 24-Watt Blum transformer replaces the existing 72-Watt Blum transformer (Z10NE020).

All existing and new SERVO-DRIVE drive units, flexes (Z10M200x) and components are compatible with the new Blum transformer.

i

Certification

The Blum transformer meets Energy Star Level VI/EU directive CoC Level V Tier 2 standby consumption and efficiency requirements and is internationally certified.

i

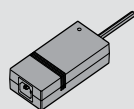

Consumption

The 24-Watt Blum transformer decreases stand-by consumption by 31% compared to current levels.

The new generation

The new Blum transformer stands out thanks to its energy-saving technology with integrated overvoltage protection, ensuring even higher levels of safety during use.

With the 24-Watt Blum transformer, it is possible to implement a complete kitchen with SERVO-DRIVE.

24-Watt Blum transformer

Nominal voltage	100–240 V
Operating power	24 V
Rated output	24 W

Z10NE030x
